Professional Summary

AI/ML Engineer specializing in generative deep learning (VQ-VAE, Transformers, LSTM) and applied LLM systems, with production deployment experience across cloud environments (AWS, Docker) and full-stack platforms (React, FastAPI, Flutter). Architected and deployed a 30M-parameter multimodal generative AI system translating audio signals into structured, beat-synchronized motion sequences at 85% beat accuracy on consumer hardware, and independently shipped an LLM-powered (Mistral-7B) conversational application end-to-end. Presented original generative-AI research at NCNTAIA-2025 (national conference). CGPA 9.49 – seeking to apply generative and agentic AI expertise to complex, data-rich industrial domains.

Internship Experience

Tech Lead, Viswam.ai

IIIT Hyderabad | Jul 2025 – Sep 2025

- Led development of a multilingual Corpus platform using React, reducing annotator clicks from **9 to 4** for **20+ users**.
- Built JWT-secured REST APIs and migrated the dashboard from Streamlit to React, reducing page load time from **4 s** to **<800 ms**. **Tech:** React, Flutter, Dart, REST APIs, JWT.

AI/ML Intern

IEEE Hyderabad | May 2025 – Jun 2025

- Developed an LSTM-based music-to-3D dance generation model using MediaPipe and Librosa, processing **100+ videos**.
- Achieved **38.56% PCK** on a custom choreography model. **Tech:** Python, TensorFlow, Keras, MediaPipe, Librosa.

Projects

AI-Based Music-to-Dance Generation System (Music2Dance AI)

2026

- Built an end-to-end **VQ-VAE + Transformer** model trained on **1,510 AIST++** dance sequences for music-to-dance generation.
- Achieved **0.0013** reconstruction loss with **100%** codebook utilization and deployed a cloud platform (FastAPI, Next.js, Docker) generating dance videos in **15–30 s**.

Plant Identification Mobile App

2024

- Developed an offline Flutter app using **TensorFlow Lite**, achieving **85%+** accuracy with **sub-200 ms** inference.

Mental Health Mobile App

2023

- Built a full-stack AI application integrating a fine-tuned **Mistral-7B** chatbot with mood tracking and appointment scheduling using Flutter, Flask, and MongoDB Atlas.

Technical Skills

Languages: Python, Java, C, C#, Dart, JavaScript, TypeScript, SQL, PL/SQL

AI/ML: PyTorch, TensorFlow, Keras, Transformers, VQ-VAE, Hugging Face, MediaPipe, OpenCV, Librosa, TensorFlow Lite

Web & Frameworks: React, Next.js, Flutter, FastAPI, Flask, .NET, Tailwind CSS

Databases: MySQL, MongoDB Atlas, RDBMS

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, Git, CI/CD, Vercel, Render

Education

Master of Computer Applications, Koneru Lakshmaiah Education Foundation

9.49/10

2024 – 2026

B.Sc. (Computer Science), Kishinchand Chellaram College, HSNC University

9.61/10

2021 – 2024

Certifications & Achievements

- **AWS Certifications:** Cloud Practitioner, Developer – Associate, Machine Learning Engineer – Associate.
- Presented the research paper *Choreography AI: Generating New Steps for Dancers in 3D Model Analysis* at the **NCNTAIA-2025** Conference (ANRF Sponsored).
- Successfully completed the **IEEE Hyderabad Section Mentorship Programme 2025** (8-week AI/ML Internship).
- **Gold Medal (1st Prize)** – 13th All India Children & Youth Art Competition.
- **Best Performance Award** – MCA Program.
